WORK EXPERIENCE

Web Developer Internship

Bay Valley Tech

📅 May 2023 - December 2023   📍 Modesto, CA

- Collaborated with other developers to build and maintain web applications, including a Quiz Generator App and a Time Tracker App.
- Contributed significantly to the development of a Quiz Generator App, which included registration, login, subject selection, tests, and score tracking functionalities.
- Played a key role in developing responsive and user-friendly interfaces, ensuring a seamless user experience.
- Participated in team meetings and provided input on project strategies and timelines.

PROJECTS

TimeWise   [github](#)

- Developed frontend components using React for seamless user interaction
- Assisted in implementing password reset validation and React Router links contributing to improved security and navigation within the application..
- Assisted in identifying and resolving UI errors, ensuring a smooth and error-free user experience.

Task Manager App   [github](#)

- Developed backend API endpoints using Node.js and Express for data management.
- Implemented user authentication and authorization functionalities using JWT for secure user access.
- Designed task creation and deletion features.
- Integrated database functionality with MySQL for storing and retrieving task data.

Social Media App   [github](#)

- Developed a student community platform using Python, Flask, pymongo, HTML, and CSS in a team of 5.
- Contributed to the development of the clubs section, enabling users to explore various clubs on campus.
- Worked on integrating the database functionality with the frontend interface to display club details to users.
